

## Heatcraft Acquires Livernois Engineering Company

August 4, 1999

RICHARDSON, Texas, Aug. 4 /PRNewswire/ -- Heatcraft Inc. announced it has acquired Livernois Engineering Co. of Dearborn, MI, a well-known manufacturer of equipment and tooling for production of heat exchangers primarily for the automotive industry. The purchase is the result of a three-year working relationship between both companies.

"We're excited to be associated with such a well-respected industry name as Livernois," said Ed French, president and COO of Heatcraft. "Through this alliance, Heatcraft will continue to enhance its technological capabilities."

Livernois provides engineering support, technical design expertise, brazing technology, prototyping, and pilot production of heat transfer coils for manufacturing needs worldwide. The company manufactures high-efficiency, computer-controlled fin forming mills, tube mills, trayers, and core building equipment.

Headquartered in Stone Mountain, GA, Heatcraft Inc. manufactures and markets heat transfer and refrigeration products throughout the world, through its Heat Transfer and Refrigeration Products divisions. Heatcraft is a subsidiary of Lennox International Inc. (NYSE: LII). Based near Dallas, TX, Lennox International is a global leader in heating, ventilation, air conditioning, and refrigeration equipment.
