

Lennox International Reports First Quarter 2007 Results; Reaffirms Full-Year Earnings Guidance

April 24, 2007

DALLAS, April 24 /PRNewswire-FirstCall/ -- Lennox International Inc. (NYSE: LII) today announced results for the first quarter of 2007. Revenue decreased 2% to \$791 million. Reported net income was \$9 million, or \$0.12 per diluted share, down from \$21 million or \$0.28 per share the previous year. Adjusted net income, a non-GAAP measure, was \$10 million, or \$0.14 per share. In the first quarter of 2006, adjusted net income was \$19 million, or \$0.26 per share. A description and reconciliation of this measure to net income are provided in the attached table.

"We had previously indicated a slow start to the year, and expected our first quarter earnings to be below those of 2006," said Todd Bluedorn, chief executive officer. "Despite the lack of momentum in residential demand in the first quarter and erosion in the outlook for housing starts, we remain optimistic the upcoming cooling season will provide more normal demand for replacement sales, which accounts for the majority of our revenue. The outlook for demand in the commercial heating and cooling and refrigeration markets is very much on track with our expectations. Our earnings in the first quarter were slightly ahead of our internal plan and we are reaffirming our guidance of diluted earnings per share for full-year 2007 in the range of \$2.50 to \$2.60 based on projected revenue growth of 6% to 8% and segment profit margin improvement of 50 basis points or more."

Cash used in operations was \$75 million and the company invested \$10 million in capital expenditures, resulting in a free cash outflow of \$85 million for the quarter. Due to the seasonal nature of its business, the company typically consumes cash in the first half of the year and generates cash in the back half. In the first quarter, LII used \$14 million to buy back 408,000 shares of LII stock. Total debt as of March 31, 2007 was \$145 million resulting in a total debt-to-capital ratio of 15%.

Business segment highlights

Residential Heating & Cooling: Revenue decreased 14% to \$361 million, reflecting a final boost from 13 SEER transition activity in the first quarter last year combined with this year's soft end market demand for furnaces. Segment profit decreased from \$42 million to \$20 million primarily as a result of lower volumes. The impact of the sales decline was most pronounced in the hearth business, which is more exposed to residential new construction than the company's heating and cooling equipment. Price improvement did offset higher commodity costs in the quarter. The company focused on cost control, but could not sufficiently offset the impact of lower sales. To reflect the influence of higher commodity prices on replacement parts, the Residential business also booked a \$4 million adjustment to warranty reserves.

Commercial Heating & Cooling: Sales grew 18% to \$163 million, with growth in both domestic and European markets. Segment profit increased to \$9 million, driven by improved results in Europe and lower variable domestic freight costs due to the company's regional distribution center initiative.

Service Experts: Sales were up 2% to \$144 million, despite the soft residential end market. By holding fixed expenses flat, Service Experts was able to leverage its sales growth so that the segment loss decreased to \$4 million from \$7 million last year.

Refrigeration: Revenue rose 12% to \$141 million, driven by strong sales growth in Europe and South America. Segment profit was practically flat at \$12 million. Solid demand from wholesale, OEM and national accounts channels in the domestic market was offset by weakness in the supermarket and cold storage segments. Strong sales growth in Europe reflected improved demand in mature markets, as well as continued growth in central and eastern Europe.
